AI-AI-O, Old McDonald had a ChatBot

From the CEO

Welcome to this month's edition of <u>Sequent Talks!</u> Get ready for a delightful blend of AI news with a humorous twist–because yes, even technology can be funny! Prepare to be entertained, amazed, and see AI from an interesting perspective.

But first, join "J"Andy and CJ as they dive into a lively debate with **ChatGPT** on manual contract management versus CLM in our latest AI Podcast episode.

Funny Tech News

<u>"Gibber"ish, the new computer language</u>**:** AI chatbots talk to each other in "Gibber"ish. We are starting to get used to talking to our computers, and so are our computers. Two AI chatbots speak to each other using "GibberLink", an old-school modem sounding language.

<u>Are you coding or "Vibing"?</u>**:** A new way to code "Vibe Coding" is emerging where we submit to the vibes of AI and forget about the nitty-gritty details, like putting an end condition for your WHILE loop. Good luck coders!

<u>AI George Carlin?</u>**:** Experts are discussing if AI's hilarity level can evolve. Best I have gotten from AI is "Why don't scientists trust atoms? Because they make up everything!". Humor is subjective, and AI has no feelings, no personal trauma, and has never run into a wall.

<u>Jordan or James, AI decides</u>**:** AI Enters the NBA G.O.A.T Debate, Aims to Settle It with a Compelling Video. It funny, touching, and of course, won't settle the debate.

<u>AI for Cows, Pigs and Chickens</u>**:** Researchers are working on deciphering the emotions of animals based on their sounds. Understanding them could help us with their well-being, or maybe a better chicken sandwich.
