May 2025 Sequent Talks

colLABORate not co-LABOR

## From the CEO

Work easier, not harder! This month's <u>Sequent Talks</u> explores better colleague collaboration and surprising "Beyond Human" partnerships in nature and tech. Discover how unconventional teamwork drives exceptional results.

## **Collaboration News**

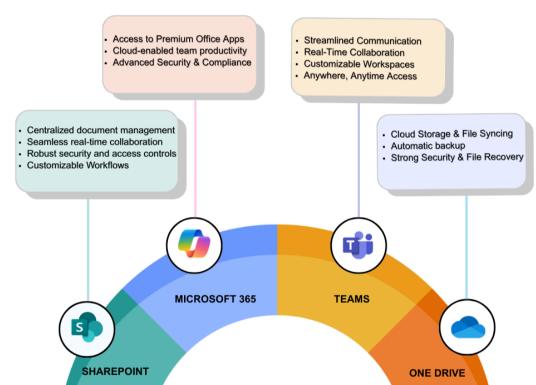

When Humans and Al Make a Dream Team - And When They Should Just Ghost Each Other: One of the most common arguments for bringing artificial intelligence into the enterprise is the potential for Al to help humans by complementing the work they do. But leaders first must understand whether and when Al and humans can perform better together than either can on its own.

Intelligent Collaboration in the Deep Sea: Octopus-fish hunting study reveals rare interspecies cooperation (Nature Ecology & Evolution). Moray eels and groupers in the Red Sea use signals to hunt together, boosting success rates over solo hunts. Unconventional teamwork in nature!

**Transform Bionic Limbs into Collaborative Companions:** <u>Adam Parker's research</u>: Al-powered bionic limbs learn and adapt to users, fostering intuitive interaction and real-time feedback, redefining human-tech partnerships in prosthetics.

## **Common Tools for Collaboration**
