

From the CEO

Welcome to our September edition of [Sequent Talks](#). Artificial Intelligence is now reshaping legal work, automating routine tasks, enhancing contract and compliance analysis, and empowering legal teams with greater efficiency and accuracy. The rise of AI in law is transforming the profession and accelerating results.

Funny Tech News

1. [AI’s Day in Court](#) Turns Into Comedy of Errors : A UK High Court judge warned lawyers after discovering fake, AI-generated cases cited in two major lawsuits, saying unchecked use of AI undermines justice and public confidence.The judges referred the involved lawyers to regulators and cautioned that future misuse could lead to prosecution.

2. [Move Over, Perry Mason](#) — Enter Crosby, the Algorithm Lawyer : Sequoia-backed startup Crosby has launched as an AI-augmented law firm, blending proprietary software with in-house lawyers to deliver contract reviews for startups in under an hour, aiming to speed up negotiations and break one of the biggest bottlenecks in business growth.

3. [Robo-Robe](#) Judges Rock Arizona : The Arizona Supreme Court has debuted two AI-generated avatars, Daniel and Victoria, to quickly deliver and explain rulings to the public in an effort to boost trust and accessibility.Officials say the avatars create videos in minutes and could expand into civic education, though experts warn about clarity, bias and making disclaimers more prominent.
